

what Sinclair Broadcasting is doing is absolutely obscene. It is actually hard to believe that something like this can be happening in our country-- and that George Orwell was only off by 20 years! Not only does their behavior show the dangers of media consolidation, it actually intends to subvert the very basis of democracy. It is perverted to think that one's voice should only be as big as one's bank account. Personally, I will be boycotting any business which advertizes with Sinclair if it does not take action to punish them.
